

Miguel Correa

Senior Full-Stack Engineer

me@miguelcorrea.dev | linkedin.com/in/mc1221 | github.com/miguelc1221 | Boulder, CO

Senior Full-Stack Engineer with experience building scalable web applications, driving UI architecture decisions, and shipping revenue-impacting features across analytics and enterprise platforms.

CORE STRENGTHS

UI Architecture • Data Visualization & Analytics • Performance Optimization • Experimentation • Observability

Tech: TypeScript, React, Node.js, Next.js, Tanstack Query, Playwright, React Native, Grafana

AI & Workflow: LLM-assisted development and rapid prototyping to accelerate product iteration

PROFESSIONAL EXPERIENCE

MNTN

05/2025 – Present | Remote

Senior Full-Stack Engineer

- Pitched and built a geo-analytics dashboard using React and Mapbox, enabling advertisers to visualize nationwide campaign performance and make faster budget allocation decisions.
- Drove critical architectural decisions for MNTN's next-generation UI platform, standardizing core UI architecture and delivering scalable dashboard patterns used across reporting experiences.
- Built internal reporting tools that reduced manual analysis workflows and improved cross-team access to performance data.
- Integrated AI-assisted tooling into development workflows to improve engineering velocity and experimentation speed.
- Introduced frontend observability for MNTN's next-generation UI using Grafana dashboards and Slack alerting, improving production visibility and accelerating incident response.

Microsoft

09/2022 – 05/2025 | Remote

Software Engineer II

- Reduced largest contentful paint from 11s to 3s through image optimization, lazy loading, and dashboard performance refactors.
- Built a shared feature flag consumption library adopted across teams, standardizing safe rollout practices and reducing release risk.
- Introduced Storybook to enable isolated component development and strengthen collaboration between engineering and design on evolving UI standards.
- Implemented end-to-end testing with Playwright and resolved accessibility gaps to meet Microsoft compliance standards.

Ro

10/2021 – 09/2022 | Remote

Senior Software Engineer

- Led development of conversion-critical features for top-selling products, driving measurable improvements in user acquisition and revenue.
- Built and optimized checkout and onboarding flows for new product launches, implementing scalable analytics tracking to support experimentation and performance insights.

Workday

Software Engineer III

01/2021 – 10/2021 | Boulder, CO

- Developed a prototype for the new search application, showcased at the Workday Rising event, demonstrating innovative search features and user experiences.

Software Engineer II

06/2019 – 09/2020 | Boulder, CO

- Reduced JavaScript bundle size by 40% and accelerated time-to-first-search-result by implementing server-sent events for real-time streaming.
- Rebuilt enterprise search client in React, improving maintainability and long-term scalability.
- Supported backend migration from Node/GraphQL to Spring Boot and Kotlin to improve API performance and scalability.

HelloFresh

10/2017 – 06/2019 | New York, NY

Senior Frontend Engineer

- Rapidly built and shipped a high-impact feature that contributed to \$15M in incremental revenue.
- Helped define the frontend architecture for a stealth startup initiative within HelloFresh, working closely with a small cross-functional team from concept to launch.
- Redesigned key user flows and ran A/B experiments to improve conversion and retention.

Backbone Labs, Inc.

10/2016 – 10/2017 | San Mateo, CA

Frontend Developer

- Created a unified mobile application across iOS and Android platforms using React Native.
- Developed and launched our first web application using React.

EDUCATION

Bachelor of Arts

12/2014 | Union, NJ

Kean University
